

customised

high-integrity flanges and pipe fittings

Meeting extreme demands

Stainless steel, duplex and high-nickel alloy products that meet the extreme demands of quality-critical environments.

Sectors using our products include oil and gas, defence and marine, petrochemical, power generation, process plant.

Delivering engineering excellence

Market-leading turnaround times

Alexander Comley Limited was established in 1920 and subsequently became one of the pioneers of stainless steel manufacturing. Today we are a market-leading British-based company, located in the Midlands. We specialise in the manufacture of customised, high-integrity flanges and pipe fittings in stainless steel, duplex and high-nickel alloys.

Our on-going success is based on a combination of three vital factors: a continuous programme of investment in the latest machining technology; a highly-skilled workforce; and a thorough understanding of the requirements of the oil and gas, defence and marine, petrochemical, power generation, and process plant industries.

By bringing these together, we can deliver products of the highest quality within short time frames – a significant advantage for our customers.

Whilst customised manufacturing services are the focus of our business, we appreciate that for many customers off-the-shelf solutions tick all the boxes. We therefore also carry stocks of standard products and hold steel bar in stock for cutting to size.

QUALITY

Our commitment to quality is total throughout all our processes.

We are ISO 9001:2008 registered and compliant. We have a dedicated Quality Director and support all material supplied with fully traceable certification. We can also arrange for outside inspection and supplementary tests if required.

As a company the directors have over 100 years industry experience. We set ourselves high standards, which we expect to meet and exceed. We have Quality, Health & Safety, Environmental and Social policies in place. Customers and potential customers are welcome to visit us at any time.

PRODUCTS

The main focus of our business is the manufacture of customised flanges and pipe fittings as well as specialised machined products. We are used to working from existing and customer drawings. We are also able to offer a reverse engineering facility.

In addition to our bespoke services we carry a range of standard and semi-finished products.

MATERIALS INCLUDE

Stainless steels	Duplex	Nickel alloys	Carbon steels	Low alloys
316/L	F51/S31803	200	A105	F5
316/H	F53/S32750	400	A350 LF2	F9
316/Ti	F55/S32760	K500		F11
304/L		600		F22
304/H		625		
321		718		
347		800/H		
310		825		
317/L		Nimonic		
		C276		
		C22		
		B3		
		6Mo		

STANDARD PRODUCTS

FLANGES

ANSI/ASME B16.5 2009: classes 150, 300, 400, 600, 900, 1500, 2500.
BSEN 1092-1:2007: PN6, PN10, PN16, PN25, PN40, PN100.
BS10:1962.

BUTT WELD FITTINGS

ANSI/ASME B16.9: end caps, stub ends, con reducers, ecc reducers, 90 degree elbows, 45 degree elbows, 180 degree return bends, equal tees, reducing tees.

BSP/NPT/SW FITTINGS

BS1740/BS3799/ANSI/ASME B16.11: elbows, tees, hex nipples, barrel nipples, weld nipples, reducing bushes, unions, square head plugs, hex head plugs, caps.

PIPE AND TUBE

ANSI/ASME B36.10/B36.19: welded pipes, seamless pipes.
ANSI/ASME 269/249/270/213: welded and seamless tubes.

BAR

BS970/A182/A490: round bar, billets.

SECTORS

When conditions are extreme, quality is vital

Alexander Comley's special flanges and pipe fittings stand up to the demands of the harshest environments.

Sectors using our products include oil and gas, defence and marine, petrochemical, power generation, process plant.

Applications are extremely varied. Our flanges and fittings are found on oil platforms, in heat exchangers, submersibles, pumps, drilling equipment, turbines, power stations, rotors, nuclear reactors, condensers, generators, boilers, pressure vessels and many other applications.

We understand engineering and manufacturing. We are able to meet the needs of clients operating in quality-critical sectors.

MANUFACTURING

Alexander Comley manufactures to the very highest standards. Engineering excellence underpins all our activities, as does a total commitment to customer satisfaction and fast turnaround. Whether you want a production run of several hundred or are looking for a specialised one-off item, we are here to meet your requirements.

MANUFACTURING CAPABILITY INCLUDES:

- > CNC machines
- > Machining centres
- > Saws
- > Presses
- > Borers
- > Manual lathes
- > Radial and other drills
